The central component is a green PCB labeled "HAWKING". It features several test points labeled "TEST POINT 1" through "TEST POINT 5". The board is populated with various electronic components, including:

- Two large electrolytic capacitors (EPCOS B43504-S3108-M3) at the bottom.
- Two red electrolytic capacitors in the center.
- Two white electrolytic capacitors (1000µF) in the middle.
- Two white electrolytic capacitors (1000µF) at the top.
- Two circular components (possibly relays or connectors) labeled "V2A" and "V2".
- Two circular components (possibly relays or connectors) labeled "V1A" and "V1".
- Two circular components (possibly relays or connectors) labeled "V3A" and "V3".
- Two circular components (possibly relays or connectors) labeled "V4A" and "V4".
- Two circular components (possibly relays or connectors) labeled "V5A" and "V5".
- Two circular components (possibly relays or connectors) labeled "V6A" and "V6".
- Two circular components (possibly relays or connectors) labeled "V7A" and "V7".
- Two circular components (possibly relays or connectors) labeled "V8A" and "V8".
- Two circular components (possibly relays or connectors) labeled "V9A" and "V9".
- Two circular components (possibly relays or connectors) labeled "V10A" and "V10".
- Two circular components (possibly relays or connectors) labeled "V11A" and "V11".
- Two circular components (possibly relays or connectors) labeled "V12A" and "V12".
- Two circular components (possibly relays or connectors) labeled "V13A" and "V13".
- Two circular components (possibly relays or connectors) labeled "V14A" and "V14".
- Two circular components (possibly relays or connectors) labeled "V15A" and "V15".
- Two circular components (possibly relays or connectors) labeled "V16A" and "V16".
- Two circular components (possibly relays or connectors) labeled "V17A" and "V17".
- Two circular components (possibly relays or connectors) labeled "V18A" and "V18".
- Two circular components (possibly relays or connectors) labeled "V19A" and "V19".
- Two circular components (possibly relays or connectors) labeled "V20A" and "V20".

3

1

4

2

Four large black cylindrical components (EPCOS B43504-S3108-M3) are mounted on the PCB. Each component is labeled with its part number and specifications: "EPCOS B43504-S3108-M3 1000µF (M) 40V/50% 12.10 S2".

Two large black cylindrical components are mounted on the metal base of the enclosure. They appear to be capacitors or similar electronic components.
